A YEAR WITH OVERSEAS VOLUNTEERS

I was with Overseas Volunteers (OV) for a year after leaving university, and I was sent to an isolated village in Chad, about 500 kilometres from the capital N'Djamena. Coming from a rich country, I got quite a shock, (19) _____ conditions were much harder than I had expected. But after a few days I got used to living there. The people were always very friendly and (20) _____, and I soon began to appreciate how beautiful the countryside was.

One of my jobs was to supply the village with water. The well was a long walk away, and the women used to spend a long time every day (21) _____ heavy pots backwards and forwards. So I contacted the organisation and arranged to have some pipes delivered. Although these pipes were not really perfect, they still made a great difference (22) _____ the villagers.

All in all, I think my time with OV (23) _____ a good experience. Although it was not paid, it was well worth doing and I would recommend it to anyone who was considering working for a charity.

* Read the following passage and choose the best answer for each of the following questions (1,25 points)

In 1998, a Valencian professor made an amazing claim. Professor Antonio Cervilla discovered how to use water as a substitute for petrol. The scientist said that you could drive from Bilbao to Valencia on just half a litre of water. His invention uses a molybdenum compound to break down water into hydrogen and oxygen. Unlike other methods, no electricity is required and the reaction happens at atmospheric temperature. This impressive technology is based on the way plant enzymes break down water. The use of molybdenum is the perfect choice because it is cheap and found all around the planet.

Since the claims were made, nothing more has been heard about this fabulous technology. There is no explanation for the disappearance anywhere on the Internet, apart from a list of similar inventions which have also vanished. An inventor from the Philippines called Daniel Dingel developed a water-fuelled car but was arrested and sentenced to 20 years in prison. If this technology were to become widely available, it would prove disastrous for petrol station owners and would also save the planet from the impending environmental catastrophes being caused by pollution.
