The Power of Music

Music is everywhere in our lives. People listen to music at home, on the bus, or while exercising. **It** is a universal language that connects people around the world. Some songs make us happy, while others help us relax. Music can also remind us of important events or people in our lives.

In some cultures, music plays a big role in celebrations. For example, in India, people use traditional drums and flutes during weddings. In Brazil, samba music is an important part of Carnival, a famous festival. These traditions help people express their joy and keep their culture alive.

Scientists believe music can also improve our health. Listening to calming music can reduce stress and help people sleep better. Some studies show that playing an instrument helps the brain stay active. This is why many schools encourage students to learn to play the piano, guitar, or other instruments.

Technology has made music more **accessible** than ever. Today, we can listen to songs online or download them to our phones. Apps and websites allow us to discover new music from every corner of the world. This is one reason why music continues to bring people closer together.

B. SHORT-ANSWER QUESTIONS (2 points = 0,5 x 1 question)

Read the following passage and answer the questions.

Protect Our Environment by Volunteering

Protecting the environment is a responsibility we all share, and volunteering is one way to make a difference. Many people join local clean-up events to collect trash from parks, rivers, and beaches. These efforts not only make public spaces more beautiful but also help protect wildlife from harmful waste.

Tree-planting is another popular volunteering activity. Trees provide oxygen, reduce air pollution, and create habitats for animals. By participating in reforestation projects, volunteers contribute to the fight against climate change. Some organizations even encourage volunteers to plant trees in their own communities, helping green urban areas.

Volunteering in education is also important for environmental protection. Many groups teach people about recycling, composting, and conserving water. These programs empower individuals to make eco-friendly choices in their daily lives. For example, schools often organize workshops where students learn how to reduce waste and protect natural resources.

In addition to local efforts, some volunteers work on larger projects. For instance, they may help clean up oil spills or restore damaged ecosystems. These activities require teamwork and often involve training, but they have a significant impact on the planet.

Volunteering not only benefits the environment but also builds a sense of community. When people work together toward a common goal, they form stronger bonds and inspire others to take action. Protecting the Earth requires everyone's effort, and every small step counts.

Read the following passage and answer the questions.

The Power of Music

Music is everywhere in our lives. People listen to music at home, on the bus, or while exercising. **It** is a universal language that connects people around the world. Some songs make us happy, while others help us relax. Music can also remind us of important events or people in our lives.

In some cultures, music plays a big role in celebrations. For example, in India, people use traditional drums and flutes during weddings. In Brazil, samba music is an important part of Carnival, a famous festival. These traditions help people express their joy and keep their culture alive.

Scientists believe music can also improve our health. Listening to calming music can reduce stress and help people sleep better. Some studies show that playing an instrument helps the brain stay active. This is why many schools encourage students to learn to play the piano, guitar, or other instruments.

Technology has made music more **accessible** than ever. Today, we can listen to songs online or download them to our phones. Apps and websites allow us to discover new music from every corner of the world. This is one reason why music continues to bring people closer together.

B. SHORT-ANSWER QUESTIONS (2 points = 0,5 x 1 question)

Read the following passage and answer the questions.

Protect Our Environment by Volunteering

Protecting the environment is a responsibility we all share, and volunteering is one way to make a difference. Many people join local clean-up events to collect trash from parks, rivers, and beaches. These efforts not only make public spaces more beautiful but also help protect wildlife from harmful waste.

Tree-planting is another popular volunteering activity. Trees provide oxygen, reduce air pollution, and create habitats for animals. By participating in reforestation projects, volunteers contribute to the fight against climate change. Some organizations even encourage volunteers to plant trees in their own communities, helping green urban areas.

Volunteering in education is also important for environmental protection. Many groups teach people about recycling, composting, and conserving water. These programs empower individuals to make eco-friendly choices in their daily lives. For example, schools often organize workshops where students learn how to reduce waste and protect natural resources.

In addition to local efforts, some volunteers work on larger projects. For instance, they may help clean up oil spills or restore damaged ecosystems. These activities require teamwork and often involve training, but they have a significant impact on the planet.

Volunteering not only benefits the environment but also builds a sense of community. When people work together toward a common goal, they form stronger bonds and inspire others to take action. Protecting the Earth requires everyone's effort, and every small step counts.

Inventions

Inventions have shaped the way we live and transformed society. From the wheel to the internet, innovative ideas have made life easier, faster, and more connected. Some inventions, like electricity and running water, are **essential** for daily life, while others, such as smartphones and televisions, add comfort and convenience.

Transportation has seen great advancements thanks to inventions like cars, airplanes, and trains. These technologies allow people to travel long distances in shorter amounts of time, bringing the world closer together. Recently, electric vehicles have become popular, offering an eco-friendly alternative to traditional cars.

Medical inventions have greatly improved human health. Vaccines, antibiotics, and medical devices like X-rays and MRI machines save millions of lives each year. In addition, wearable health technology, such as fitness trackers, helps people monitor their well-being and adopt healthier habits.

Communication has also been revolutionized by inventions. The telephone, radio, and internet have enabled people to stay in touch no matter where they are. Video calling and instant messaging are now common, making the world feel smaller and more connected.

While inventions bring many benefits, they also come with **challenges**. Issues like pollution, privacy concerns, and over-reliance on technology require careful consideration. Nonetheless, human creativity and innovation continue to drive progress, paving the way for a better future.

B. SHORT-ANSWER QUESTIONS (2 points = 0,5 x 1 question)

Read the following passage and answer the questions.

The Power of Music

Music is everywhere in our lives. People listen to music at home, on the bus, or while exercising. **It** is a universal language that connects people around the world. Some songs make us happy, while others help us relax. Music can also remind us of important events or people in our lives.

In some cultures, music plays a big role in celebrations. For example, in India, people use traditional drums and flutes during weddings. In Brazil, samba music is an important part of Carnival, a famous festival. These traditions help people express their joy and keep their culture alive.

Scientists believe music can also improve our health. Listening to calming music can reduce stress and help people sleep better. Some studies show that playing an instrument helps the brain stay active. This is why many schools encourage students to learn to play the piano, guitar, or other instruments.

Technology has made music more accessible than ever. Today, we can listen to songs online or download them to our phones. Apps and websites allow us to discover new music from every corner of the world. This is one reason why music continues to bring people closer together.

B. SHORT-ANSWER QUESTIONS (2 points = 0,5 x 1 question)

Read the following passage and answer the questions.

Protect Our Environment by Volunteering

Protecting the environment is a responsibility we all share, and volunteering is one way to make a difference. Many people join local clean-up events to collect trash from parks, rivers, and beaches. These efforts not only make public spaces more beautiful but also help protect wildlife from harmful waste.

Tree-planting is another popular volunteering activity. Trees provide oxygen, reduce air pollution, and create habitats for animals. By participating in reforestation projects, volunteers contribute to the fight against climate change. Some organizations even encourage volunteers to plant trees in their own communities, helping green urban areas.

Volunteering in education is also important for environmental protection. Many groups teach people about recycling, composting, and conserving water. These programs empower individuals to make eco-friendly choices in their daily lives. For example, schools often organize workshops where students learn how to reduce waste and protect natural resources.

In addition to local efforts, some volunteers work on larger projects. For instance, they may help clean up oil spills or restore damaged ecosystems. These activities require teamwork and often involve training, but they have a significant impact on the planet.

Volunteering not only benefits the environment but also builds a sense of community. When people work together toward a common goal, they form stronger bonds and inspire others to take action. Protecting the Earth requires everyone's effort, and every small step counts.
