A B C D

4. He shouted at his girlfriend, that really disappointed me.

A B C D

5. Please turn off television. I also like watching TV but now I am having to study for the exam.

A B C D

6. I came to class very early, so the teacher was late due to heavy traffic.

A B C D

**\* Read the following passage and choose the best answer for each of the following questions (1.25 points)**

If you want to make your school green, think beyond your classrooms. Here are some suggestions that are all easy and simple to follow, and can make a big difference in reducing your carbon footprint and creating a sustainable community.

One of the places where both teachers and students often spend some of their time is the library. An eco-friendly reading space is likely to create a **favourable** impression on library users, and bring some significant educational benefits. For example, you can install energy-saving products like fans instead of air-conditioners which consume a lot of energy. You can also use biodegradable dust cloths or old T-shirts to clean the environment. In addition, to raise public awareness, allocate a clearly visible space on the noticeboard for everyday green tips like 'Let others reuse your book'.

Sporty students may prefer to spend more time in the swimming pool than in the library. Therefore, keeping this place safe and green will also help to raise their environmental awareness. Remember that chlorinated pool water may cause red eyes and itchy skin to some people if they spend much time in the pool. An ideal alternative would be a salt-water pool, which can be naturally clean and economical. In case warm water is required, think of solar heating to save the environment as one pool with gas or electric heater may emit tons of carbon dioxide each year.

Finally, focus on the school gym, which is perhaps the most interactive and exciting place for all school staff. Think of installing low-flow taps and showers to save gallons of water per minute and energy-saving lights to cut the cost of electricity. Moreover, make sure that the airflow pathways are clear and free of mould, mildew and other allergens.

7. Which of the following statements is not supported by the passage?

A. The writer claims that the suggestions are effective, simple, and easy to do.

B. Old T-shirts can be used as dust cleaners.

C. The airflow pathways in the school gym need to be cleaned

D. Daily tips on how to recycle books are placed on the library noticeboard.

8. Which of the following statements is supported by the passage?

A. It's impossible to make the school gym an environmentally friendly place.

B. Solar heaters may release a large amount of CO<sub>2</sub>.

C. A salt-water pool will cost less to maintain than a chlorinated one.

D. Using old T-shirts is good for books in the library

9. Which energy-saving product is NOT mentioned in the text?

A. Fans

B. Energy-efficient windows

C. Solar heating

D. Energy-saving lights

10. The word "favourable" is closest in meaning to .....

- A. positive B. negative C. great D. suitable

mã 124

11. What do you think is the best title for the text?

- A. How to make your community green  
B. Ways to raise students' awareness of being environmentally friendly  
C. How to make your school more sustainable.  
D. Pollution in schools

**\*Read the passage and choose the best option for each blank. (1.25 points)**

Mexico City is growing quickly. In 1970, the city had about 9 million people. Now it has over 17 million. All these people are causing (12) \_\_\_ for the city. There are not (13) \_\_\_ jobs. Also, there is not enough housing. Large families have to live together in small homes. Many homes do not have water. They also do not have bathrooms or electricity. \* Read the following passage and choose the best answer for each of the following questions (1.25 points)

If you want to make your school green, think beyond your classrooms. Here are some suggestions that are all easy and simple to follow, and can make a big difference in reducing your

carbon footprint and creating a sustainable community.

One of the places where both teachers and students often spend some of their time is the library. An eco-friendly reading space is likely to create a **favourable** impression on library users, and bring some significant educational benefits. For example, you can install energy-saving products like fans instead of air-conditioners which consume a lot of energy. You can also use biodegradable dust cloths or old T-shirts to clean the environment. In addition, to raise public awareness, allocate a clearly visible space on the noticeboard for everyday green tips like 'Let others reuse your book'.

Sporty students may prefer to spend more time in the swimming pool than in the library. Therefore, keeping this place safe and green will also help to raise their environmental awareness. Remember that chlorinated pool water may cause red eyes and itchy skin to some people if they spend much time in the pool. An ideal alternative would be a salt-water pool, which can be naturally clean and economical. In case warm water is required, think of solar heating to save the environment as one pool with gas or electric heater may emit tons of carbon dioxide each year.

Finally, focus on the school gym, which is perhaps the most interactive and exciting place for all school staff. Think of installing low-flow taps and showers to save gallons of water per minute and energy-saving lights to cut the cost of electricity. Moreover, make sure that the airflow pathways are clear and free of mould, mildew and other allergens.

20. What do you think is the best title for the text?

- A. How to make your community green
- B. Ways to raise students' awareness of being environmentally friendly
- C. How to make your school more sustainable.
- D. Pollution in schools

21. The word "favourable" is closest in meaning to .....

- A. positive
- B. negative
- C. great
- D. suitable

22. Which energy-saving product is NOT mentioned in the text?

- A. Fans
- B. Energy-efficient windows
- C. Solar heating
- D. Energy-saving lights
